  - Wine Creek Road Residence, Headsburg, CA

**CAREER PROFILE**

Since the early 1990s Henry Siegel has championed the idea that ecological design and design excellence are inseparable; he has put that idea into practice as lead designer of many Siegel & Strain projects. The firm has received over fifty national, regional, and local design awards, including four Top Ten Green Projects of the Year awards from the AIA's Committee on the Environment (COTE); he is past chair of the COTE National Advisory Group and active at the national level in advocacy for sustainable design and the incorporation of sustainable design values into architectural awards programs and architecture school curriculums.

Mr. Siegel has taught sustainable design and design studios at the University of California, Berkeley, and is a past member of the University's Design Review Committee. He has spoken widely on ecological design and the work of the firm at national conventions and universities. He has served on many architectural awards juries, including the AIA National Honor Awards jury and the COTE Top Ten Green Projects jury.

Mr. Siegel founded Henry Siegel Associates in 1985. The firm became Siegel & Strain Architects in 1991 when Mr. Strain became a partner. Prior to starting his own firm, Mr. Siegel was an associate in the office of William Turnbull Associates in San Francisco, where he worked on many award-winning projects.
