- › Project Architect
  - Richmond Municipal Natatorium, Richmond, CA
- › LEED Consultant
  - The David Brower Center, Berkeley, CA
- › Research Architect
  - Emeryville Resourceful Building, Emeryville, CA

**CAREER PROFILE**

Nancy Malone has managed many of the institutional and environmental projects. Nancy's most recent work as Project Principal includes the recently completed Tidewater Boating Center in Oakland and the Environmental Education Center in Yosemite National Park. She was the Project Manager for the off-the-grid visitor center at Pinnacles National Monument and for the Camp Arroyo Environmental Education Center, an AIA Top 10 Green Building.

Previous experience includes leading a research team for the Emeryville Resourceful Building project that resulted in publication of the results, as well as an AIA Research Award and Top 10 Green Building Award. She also coordinated LEED accreditation on the Orinda City Hall project (LEED Gold) and the David Brower Center in Berkeley (LEED Platinum). Her previous experience working in local architecture firms includes the Ecological Design Institute in Sausalito, CA, where she researched alternative materials and construction methods, and coordinated the design and documentation of a large rammed earth building.

Nancy has taught Resource Efficient Design at the University of California, Davis and in the School of Architecture at the University of California, Berkeley. Over the years, she has served on several Technical Advisory Groups creating or advising on green building standards, including LEED-NC, LEED-H, and the GreenPoint Rated systems.

**EDUCATION**

- › Master of Architecture, University of California, Berkeley, CA
- › Bachelor of Science, Environmental Design, University of California, Davis, CA
